SUMMARY

Electrical and Electronic Engineering undergraduate with a strong, self-driven focus on software development. Comfortable across the stack, from building REST APIs with FastAPI to developing user interfaces with React, backed by solid fundamentals in data structures, algorithms, and object-oriented programming. Seeking an entry-level or internship opportunity to apply and grow these skills in a real-world engineering team.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

Computer Science Foundations: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Backend: FastAPI, REST API design, SQL databases

Frontend: React, HTML, CSS, JavaScript

Tools: Git, GitHub

PROJECTS

Todos-FastAPI | *Python, FastAPI, SQL*

- Built a full CRUD to-do list application with a FastAPI backend and a SQL database, supporting creating, reading, updating, and deleting tasks through RESTful endpoints.
- Designed the database schema and API routes to ensure clean separation between data models and business logic.

MovieShop-FastAPI | *Python, FastAPI*

- Developed a movie catalog and browsing API using FastAPI, enabling users to search and view movie listings through structured RESTful endpoints.
- Applied FastAPI's data validation and routing features to build clean, well-organized backend logic.

Additional Projects

- Built several other personal and academic projects using C++, Python, React, HTML, CSS, and JavaScript, covering both backend logic and frontend interfaces (full portfolio on GitHub).

EDUCATION

Daffodil International University

Bachelor of Science in Electrical and Electronic Engineering (EEE) — In Progress

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Programming with C/C++, Database Systems, Web Application Development
